Little did we know that within a year mild mannered Dave McGarry would heroically become our mascot. Trafficking with *Natasya* around the globe. It's Worth Asking About

Now than thirty years ago I had a minor stroke. The doctor told me that I could never give blood so I never did nor did I ever research why not. After stopping to volunteer at our blood drive at Gate City Brewery I decided to finally research why I couldn't give blood. After contacting the Red Cross I learned that I can, in fact, donate my blood. That made my day!

Please help us -- or have a friend or someone help us in this lifesaving effort. [Click here to reserve a source March 2005](#). To donate at State FFA Banquet

March 27 Blood Drive at Gate City 10:00am-6:00pm

It's Worth Asking About

"I have never donated my blood," shared prospective member Greg Roth.

More than thirty years ago I had a minor virus. The doctor told me that I could never give blood so I never did nor did I ever research why not. After signing up to volunteer at our blood drive at Gate City Brewery I decided to finally research why I couldn't give blood. After contacting the Red Cross I learned that I can, in fact, donate my blood. That made my day!

Blood is needed every day of the year. There is no substitute for blood. Donors provide the only supply of life-saving blood for those in need.

I plan on making up for lost time and will donate my blood at every Roswell Rotary Club Blood Drive in the future.

Please join me -- or have a friend or coworker join me in this lifesaving effort. [Click here to reserve a space March 27th](#) to donate at Gate City Brewery.

Phase two of our Panama Water Project has begun!
1600 Panamanians Helped by Roswell Rotary's Water Project

1600 people (more than half children) are being lifted by your efforts. Clean water means better education, efficiency, and exponentially greater opportunities for them and their children for future generations.

Because of the remote locales - inaccessible by heavy equipment and conventional government project processes - local labor is used extensively by necessity AND design. This has resulted in a cash cost estimated to be 80% less than what it would have cost the government to achieve the same results.

And our Rotary project is far more sustainable. In building the water system themselves, the villagers understand and can repair it, as well as having a pride-filled sense of ownership. They are aware, and deeply grateful, that their lives have been fundamentally altered and improved.

In recognizing our efforts, the government articulated an unexpected dividend from the project - greater national security and community strength. A stronger and more united citizenry in remote - especially border - areas stabilizes the society amid the current immigration crisis and criminal oppression.

We had not expected that. Many good things come from doing good. Seeing Rotarians truly living out "Service above Self" reverberates in ways we may never know.
